WORK EXPERIENCE

HMH (Contract)

Technical Support Specialist

Remote

Feb 2026 - Present

- Provide remote technical support to New York educators utilizing HMH software platforms for statewide assessments, troubleshooting software issues and ensuring uninterrupted access during critical testing periods
- Resolve technical inquiries via phone, email, and chat, delivering timely solutions for authentication, navigation, and system functionality issues
- Document and properly escalate technical issues through CRM systems

John C. Hitt Library

LibTech Assistant

Orlando, FL

Dec 2023 - Present

- Delivered tier 1 and tier 2 technical support for 1000+ weekly service requests involving Windows, iOS, and AV equipment checkout and returns.
- Performed hardware and software troubleshooting for library patrons, resolving issues related to operating systems, applications, network connectivity, and peripheral devices.
- Maintained asset inventory management system, tracking 500+ devices and coordinating software updates, firmware patches, and preventive maintenance schedules.

University of Central Florida

Resident Assistant

Orlando, FL

March 2025 - Present

- Served as primary point of contact for 50+ residents, managing community standards enforcement, crisis intervention, and conflict resolution while maintaining detailed incident documentation.
- Managed resident communications using ticketing systems and digital platforms to track, prioritize, and resolve support requests efficiently.
- Administered MySQL database and Power BI dashboards to analyze program metrics and generate reports for 10+ monthly events, improving engagement through data-driven decision making.

TECHNICAL PROJECTS

Active Directory Home Lab

- Deployed Windows Server 2022 environment with multiple virtual machines to simulate enterprise IT infrastructure, implementing Active Directory Domain Services, Group Policy management, and user provisioning.
- Configured virtualization using hypervisor technology to develop hands-on experience with network security, system administration, and disaster recovery procedures.

AR-boretum

- Engineered full-stack application using Unity (C#) and AR technology with backend database integration to deliver interactive educational content for UCF Arboretum visitors.
- Implemented QR code scanning functionality and 3D rendering engine to create seamless mobile user experience across iOS and Android platforms.
